Ask Our Experts

The Ask Our Experts lounge is many visitors' first destination at the show. Discuss your project with some of Build It magazine's regular contributors, who are all specialists in their field. Our Experts will provide you with practical, impartial advice that could be worth £1000s. Come prepared with your questions, floor plans or other documents, and take advantage of this fantastic opportunity. **N.B. Slots can only be booked on the day, not in advance.**

JULIA RIDDLE
PLANNING

Julia is a planning consultant with over 15 years of experience in a variety of planning work, including advising on and achieving planning permission for residential development on a range of scales. She has been involved in writing guidance on custom and self-build to inform the national planning approach and is a member of the Right to Build Task Force, aiming to grow opportunities for bespoke housebuilding.

OPINDER LIDDAR
ARCHITECTURE
& DESIGN

Opinder is a Build It Award-winning architect and a director at Lapd Architects. He specialises in self-build homes and renovation projects. Opinder is a regular at the Build It Live exhibitions and designed Build It's Self Build Education House, which you can tour virtually at self-build.co.uk/ourhouse.

TOM MCSHERRY
FINANCE

Tom has worked in the financial services industry for over 25 years – the last 10 of these specialising in self-build mortgages and finance at BuildStore, providing expert advice to hundreds of customers embarking on the bespoke home journey. Tom has completed two major home building projects himself and is widely regarded as a self-build finance expert.

MIKE HARDWICK
SELF BUILD & PROJECT
MANAGEMENT

Since successfully finishing his own bespoke home, Mike has become a well-respected project manager and self build consultant. He is a prominent figure in the industry and, until last year, was general manager at the National Custom & Self Build Association.

NIGEL GRIFFITHS
ECO HOMES &
RENEWABLES

Nigel advises on sustainable new build, retrofit of existing buildings and renewable energy. He is the author of the Haynes Eco-House Manual, and until recently was Director of the Sustainable Traditional Buildings Alliance. He has advised UK government on energy policy and inspected hundreds of biomass and heat pump installations on behalf of Ofgem.

SUNDAY ONLY

ALAN TIERNEY
RENOVATION & PERIOD
PROPERTIES

Alan is a period property and building conservation specialist. Until recently he ran an historic buildings consultancy offering hands-on advice to heritage homeowners, but is now focussed on his current project: renovating a grade II* listed cottage.

MARTIN GAINÉ
PLANNING

Martin is a chartered town planner, founder of planning consultancy, Just Planning, and author of How To Get Planning Permission – An Insider's Secrets. He champions homeowners in the planning system, helping them to solve sticky planning problems, get planning permission, win appeals and deal with enforcement issues.

MARK STEVENSON
PROJECT MANAGEMENT

Mark has worked as a construction professional for over 35 years and is a serial self builder with a knowledge of self build finance. Former Chair of NaCSBA, he runs project management consultancy Elsworth Projects and advocates for the interests of self builders and contributes to the success of the emerging custom build industry.

JULIAN OWEN
ARCHITECTURE
& DESIGN

Julian is Build It's design doctor. A self-build architect with his own practice, he is also the founder of the Association of Self Build Architects. He has written a number of books on the subjects of self-build, alteration and extensions, loft conversions and timber frame building.

The Clinics

DAVID HILTON
HEATING, RENEWABLES
& VENTILATION

David is a renewables and ventilation installer, with over 35 years' experience. He is a member of the Gas Safe Register, has a Masters degree in Sustainable Architecture, and is an authority in sustainable building and energy efficiency, with extensive knowledge in building fabrics, heat recovery ventilation, renewables and conventional heating systems. See David in the Heating Advice Clinic.

MARTYN PHILLIP
SELF BUILD, EXTENSIONS
& RENOVATIONS

With over two decades of experience, Martyn specialise in the self build, extension and home renovation market, guiding clients from concept to completion. He offers expert advice on planning, design, and construction, ensuring compliance with regulations while delivering bespoke, high-quality outcomes tailored to individual needs. His hands-on approach helps homeowners confidently navigate every stage of their project. Meet Martyn at the Extensions Clinic.

STEVE SEVIER
BASEMENTS & STRUCTURAL
WATERPROOFING

Steve is a structural waterproofing engineer, and was the hands-on installer for the waterproofing solutions at Build It's Self Build Education House. He has over 35 years' experience delivering high-quality basement living spaces. Meet Steve at the Basement Advice Clinic.

JOHN SPEARMAN
BASEMENTS & STRUCTURAL
WATERPROOFING

John is a specialist in new build and retrofit basement projects, and a certificated surveyor in structural waterproofing. He is director of Surrey Basements, which completed the waterproofing design and installation for the basement at Build It's Self Build Education House. Head to the Basement Advice Clinic to chat with John.

SIMON WILD
ESTIMATING & COSTS

Simon is Senior Estimator for the Build It Estimating Service, having had his own home extension building business in the late 90s. For over 15 years the HBXL Estimating Service has benefitted from Simon's extensive building knowledge, which more recently is also being shared with users of the Build It Estimating Service. Like all the estimators in the team, he certainly knows his way around a plan and will very quickly point out any anomalies. Pick his brain at the Build Cost Clinic.

Seminar THEATRE

9

**FREE
SEMINARS**
EACH DAY

Our series of free seminars are developed by Build It's editorial team and our panel of experts to ensure all common questions are covered and to give you the knowledge to take control of your project. Please ensure you turn up promptly to get a seat. The programme is repeated each day.

10.20

A STEP BY STEP GUIDE TO SELF BUILD

Discover the pros and cons of building your own home. Build It's self build expert explains the process - from finding land, to setting a budget, designing your dream home and finding a builder.

11.00

DESIGNING YOUR DREAM HOME

Getting your design right is the essential element in creating your dream property. One of Build It's architecture experts will discuss how to plan and realise a home that works for you and your family, whether you're looking to renovate or build from scratch.

11.40

ECO HEATING DEBATE

In this lively session, sector specialists will argue the pros and cons of various home energy solutions, from heat pumps to gas boilers.

12.20

RENOVATING A HOME WITH CHARACTER: UPDATING AN OLD HOUSE FOR MODERN ECO LIVING

Build It's period property and eco specialist gives advice on the potential minefield of renovating or converting existing homes, including older buildings. They will talk through everything you need to know about converting an old house into a modern low-energy home.

13.00

HOW TO ADD MORE SPACE & VALUE

Discover the best value-adding projects for existing homes, from extensions through to loft conversions, and assess

which option best suits your family's needs.

13.40

PANEL SESSION: THE PERFECT WAY TO BUILD YOUR HOME

- PLUS THE GREAT BUILD SYSTEMS DEBATE!

Uncover the pros and cons of the most popular construction systems in the UK: timber frame, brick & block, SIPs and ICF. A build systems expert discusses which structural option will suit your design, plot, budget and energy efficiency requirements.

14.20

THE DIFFERENT ROUTES TO MANAGING YOUR PROJECT

What are the routes you could take to build, renovate or extend your own home? Our project management expert explains what's involved in running the project yourself - from purchasing materials and hiring tradesmen to finishing on time and on budget! They'll also guide you through the other routes available and how costs vary.

15.00

BUILDING A SUSTAINABLE HOME

Our eco specialist talks through everything you need to know about creating a low-energy home that's cost-effective to run - including why it's important to get the house's 'fabric' right before you invest in renewable technologies, and what you need to consider during the construction stage.

15.40

HOW TO FIND LAND AND GET PLANNING PERMISSION

Your dream home starts with obtaining planning permission. Our plot and planning gurus guide you through the essential elements from submitting an application and gaining consent to appeals and tips on dealing with planners. They also give invaluable advice on finding a plot of land.

HEATING ADVICE CLINIC

If you're looking for a heating system for your project, then you know there are a myriad of options. Visit our Heating Advice Clinic to help you decide on the best heat source for your home. From gas boilers (mains & LPG), oil boilers, ground source, air source to solar, come and discover the pros and cons, and talk to our heating expert.

BASEMENT ADVICE CLINIC

Building a basement is a cost effective way to create high-quality space ... and to beat the planners! In Europe they are common place, but here we've overlooked this opportunity for too long. Visit the Basement Advice Clinic to discover how it could give you the extra space you need.

EXTENSION ADVICE CLINIC

If you love your current home, but want to add more space, then an extension might be the right route for you. When executed properly, extensions can add thousands to your property's worth. However, sometimes obtaining planning permission for your extension can be tricky. Visit the Extensions Clinic at the show for professional one to one advice!

BUILD COST CLINIC

Getting a grip with what your self-build or renovation project is likely to cost will help you focus your design choices, check builders' quotes and may even save you money! Visit the Build Cost Clinic for free advice!

Real Life Projects

Visit the Workshop Theatre at the times below to hear successful project stories from our readers directly. Hear these true stories and gain practical knowledge and tips to help you with your project.

SATURDAY 30 MAY

MEET TRINA & FELIPE

Trina Collins and Felipe Jauregui spent 18 months renovating a small house in a pretty Gloucestershire town, only to realise it was too small. The solution was obvious: build a new property in the garden. With a fair amount of renovation experience, the couple opted to take on the project management, hiring subcontractors as necessary. Their first thought was to use a SIPs system, but their finance options were limited. Instead, they chose timber frame with cement fibre board cladding - a pragmatic choice for their thin, angled, sloped plot. After five years of hard work, the couple have a stunning two-bedroom house, built to almost Passivhaus standard. It is clad in black fibre cement with cantilevered sections, plenty of glazing, and a separate living space and bedroom for Trina's father to enjoy. Sustainability was important to the couple, so they employed a range of options to insulate the home and keep a lid on their energy usage. Find out more about this inspiring project, live at the Workshop Theatre.

SUNDAY 31 MAY

MEET SHOBA WITH ALLISTER GODFREY ARCHITECTS

Hari and Jacqueline's modern light-filled three-bedroom home (Wunschhaus), set back from the busy high street of one of the oldest villages in Britain, draws inspiration from historic layouts, forms and materials. With a design in place, the couple approached Allister Godfrey Architects to take it to completion. They simplified the scheme and construction in a way that would retain the original design intent. Key changes include a switch from cross-laminated timber to structural insulated panels (SIPs) and incorporating an existing concrete swimming pool to form a basement zone - rather than paying to have it demolished and filled. Working with a trusted contractor, the finished house came in £8,000 under budget. "Allister not only created a beautiful house for us but a space that truly feels like home," say Hari and Jacqueline. Meet Allister and Hari's daughter Shoba, who worked on the interior design for Wunschhaus, live at the Workshop Theatre.

LAND ZONE

FIND
YOUR
PLOT

@ Build It Live

Make sure you visit the Land Zone, brought to you by PlotBrowser – the online portal dedicated to real building plots. Here, you'll be able to discover the various routes to finding the right plot for your build. The Land Zone will offer valuable tips for finding land, and you'll be able to browse live listings currently for sale, in order to secure your very own piece of land.

SO MUCH TO THINK ABOUT!

There is a lot to consider when hunting for a plot of land to build your dream home on.

Does the plot have planning permission granted? If so, what type of planning permission - detailed with specifics in place or more flexible outline permission?

When does the planning permission expire, or has it already done so?

And so the list of considerations goes on.

LAND-FOCUSED SEMINARS AND ADVICE

Don't miss the Seminar Stage at 15.40 each day for "How to find land and getting planning permission" and the Workshop Theatre at 10.30am on Sunday for "Finding Land - What makes a good plot?"
